

Enea Malaj

Senior Full-Stack Software Engineer

eneamalaj13@gmail.com | (+39) 331 539 3258 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior full-stack software engineer with 7 years of experience building production web applications. Strong in React, Next.js, TypeScript and GraphQL, with hands-on technical leadership, architecture ownership and direct client collaboration across enterprise and product environments.

EXPERIENCE

Condense S.r.l. - Full-Stack Developer

Nov 2024 - Present

INVERSO - Fund-management platform for Investire SGR

Apr 2025 - Present

- Lead technical delivery, organize the team's work, review code and work directly with the client to turn evolving requirements into solutions and implementation priorities.
- Own frontend architecture: library selection, application structure, GraphQL integration patterns, shared abstractions, development conventions and refactor-versus-ship tradeoffs.
- Deliver end-to-end features across Next.js, TypeScript, Apollo Client/Federation, WebSockets and file-processing services, including complex data workflows and permissions.

Gabetti Home Value - Real-estate marketing CMS

Jan 2025 - Apr 2025

- Built Gruppo Gabetti's headless-CMS real-estate site, owning the responsive Next.js frontend, content integration, media optimization and SEO-friendly navigation.

Abstraqt S.r.l. - Full-Stack Developer

Dec 2023 - Nov 2024

- Developed full-stack features for INPS's Assegno Unico platform, a nationwide benefit system serving millions of families within a large, multi-team environment.
- Resolved cross-team technical issues across React/TypeScript, .NET and SQL Server.

Freelancer - Full-Stack Developer

Jan 2023 - Dec 2023

- Designed and delivered a custom CRM for dental clinics across PHP, JavaScript and SQL, translating evolving client requirements into production features.
- Led a 3-developer team across requirements, delivery and hands-on coding, working directly with stakeholders and meeting project milestones.

Yoox-Net-A-Porter - Junior Full-Stack Developer

Apr 2018 - May 2021

- Built web applications with React/JavaScript, C#/.NET, SQL and MongoDB for global luxury e-commerce.
- Practiced test-driven development alongside Java 8 backend engineers to ship maintainable code.

SKILLS

Languages: TypeScript, JavaScript, C#, Java, PHP, SQL, HTML/CSS

Frontend: React, Next.js, Apollo Client, Tailwind CSS, AG Grid, Mantine, shadcn/ui
